## MBA - ENTREPRENEUR PROGRAMS

Statdash was created with high level business education programs in mind.

The dashboards you build are customizable for your organizational needs. Statdash enhances communication between student and/or team members while keeping everyone on track with the status of their work.

Habits reinforced by Statdash, such as planning, organizing, and prioritizing work, lend themselves very well to developing business acumen and real-world project management skills—giving students the tools they need to become strong team leaders.

Beyond graduation, students can continue to utilize Statdash as a powerful team-management tool in the business world.

- ☑ Develops Strong Organizational Skills
- ☑ Improves Team Communication
- ☑ Customizable for your Course or Project Management Needs
- ☑ Enhances Personal/Professional Prioritization and Time Management Skills

## TESTIMONIALS

"Statdash not only helps my students stay on track with their course assignments, it also allows me to see when they are falling behind. I can set due dates for projects, automate email reminders for upcoming deadlines and so much more.  Statdash is an organizational tool every teacher and student needs!"

*Thomas R. Ulbrich, Assistant Dean,*
*University at Buffalo School of Management*

"I use Statdash extensively at work to manage multiple complex projects."

*Patricia David, Owner and Lead Consultant,*
*GoldStar ID*

"The staff at Statdash are some of the most responsive group I've ever worked with!"

*Jenna Roessler, Operations Coordinator,*
*University at Buffalo*
*Center for Entrepreneurial Leadership (CEL)*

"Great software for quickly understanding the status of your team."

*Kurt Jordan, Mentor,*
*SCORE*

# Equipping Entrepreneurs for Success

Statdash

Statdash is an exciting new tool designed to help educators track student progress while streamlining and centralizing teacher-student communications. This is done through our user-friendly, online dashboard system.

At a glance, you will be able to track the progress of each student—task-by-task—project-by-project—throughout the entire course. Students will post regular status updates to your custom online dashboards and will know what is expected of them—receiving automated status requests, important reminders, and access to online syllabi and course curricula.

Our system eliminates the problems associated with sending and receiving dozens of status emails, voicemails, and text messages from multiple sources at different times. Statdash puts all of the important status information in front of you at once—in one highly-customizable, well-organized format.

As an educator, you will create custom dashboards for each of your courses using our easy, step-by-step instructions and videos. You will have the ability to input curricula, syllabi, course requirements, due dates and other important information.

Once you have created your dashboards for a course, you use our system to send out email invitations to your students so that they may register and begin viewing and interacting with the dashboards.

Dashboards can be saved as templates, duplicated, and modified. You can build a library of templates for use with future courses.

Dashboards are color-coded and highly-customizable, promoting a strong visual overview.

Students can easily check the status of group projects.

You can use your dashboards to generate and send status reports.

Students can update their status for a given task from a dropdown menu. They may also add notes which become visible when scrolling over the specific cell.

Set your dashboards to send out due date notifications and status requests automatically.

One click easily emails status update notifications to selected students for specific dashboard activities.
